

Caversham Park Primary School

Whole School Digital Citizenship Curriculum Map

The most effective approach to online safety is to treat it as a whole school community issue, with educational messages embedded across Computing/ICT, PSHE, RHE and citizenship, as well as touching on online safety issues across the curriculum whenever and wherever children are using technology. The SMART rules threaded through all units and referenced in all lessons.

The curriculum below covers the follow core areas of online safety:

Media Balance and Well-Being	Privacy & Security	Relationships & Communication	Cyberbullying	Digital Footprint & Identity	News and Media Literacy
------------------------------	--------------------	-------------------------------	---------------	------------------------------	-------------------------

National Curriculum

The national curriculum for computing aims to ensure that all pupils are responsible, competent, confident and creative users of information and communication technology

KS1 Objectives

Pupils should be taught to:

- use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies

KS2 Objectives

Pupils should be taught to:

- understand computer networks, including the internet; how they can provide multiple services, such as the World Wide Web, and the opportunities they offer for communication and collaboration
- use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content
- use technology safely, respectfully and responsibly; recognise acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.

The follow scheme of work is embedded into the computing curriculum and in the majority of cases the digital citizenship lesson is the first in the sequence of lessons for each unit. Additional digital citizenship is included in the wider computing curriculum.
